CAREER OBJECTIVE

Final-year IT undergraduate with hands-on experience in full-stack development, cloud platforms (OCI, Firebase), and Python/Java-based backend systems. Seeking a Graduate Engineer Trainee role at Hexaware to apply strong programming fundamentals, database skills, and project experience in building scalable, real-world applications.

EDUCATION

M. Kumarasamy College of Engineering, Karur <i>Bachelor of Technology – Information Technology CGPA: 8.16</i>	2023 – 2027
Star Matriculation Higher Secondary School, Karur <i>Higher Secondary Certificate (HSC) Percentage: 84.50%</i>	2021 – 2023
St. Antony's Matriculation Higher Secondary School, Karur <i>Secondary School Leaving Certificate (SSLC)</i>	2020 – 2021

TECHNICAL SKILLS

- Languages: Java, Python, Dart, C, SQL
- Frameworks & Tools: Flutter, Node.js, React, Android Studio
- Cloud & Database: Oracle Cloud Infrastructure (OCI), Firebase, MySQL, MS SQL Server
- Developer Tools: Git, GitHub, VS Code, Android Emulator

PROFESSIONAL EXPERIENCE

Software Development Intern, Terzo Limited, Coimbatore 2025 (25 Days)

- Gained hands-on exposure to the full Software Development Life Cycle (SDLC) while working on enterprise-level projects.
- Developed Python-based backend scripts and optimized SQLite database schemas, improving query efficiency for internal enterprise tools.
- Integrated frontend components with backend APIs following clean architecture and Agile methodologies.
- Identified and resolved critical application errors during performance tuning, improving overall application stability.
- Collaborated using Git/GitHub for version control and maintained detailed technical documentation for handover.

PROJECTS

AI-Powered Multi-Model Comparison & Voice Recommendation (Aether AI)

- Developed a web platform to compare responses from multiple AI models (ChatGPT, Grok, Llama, DeepSeek) using weighted scoring metrics.
- Integrated Speech-to-Text (STT) and Text-to-Speech (TTS) using Web Speech APIs for hands-free interaction.
- Built using Node.js, Express, and JavaScript to analyze model accuracy, relevance, and clarity.

Live Bus Tracking System with Real Road Navigation (Payanam)

- Engineered a campus transit solution providing real-time location, ETA, and live road navigation.
- Implemented role-based access for students and drivers with cloud-based geofencing alerts for route changes.
- Developed using Flutter and Firebase for high-performance cross-platform data synchronization.

Intelligent Health Monitoring System (Noura)

- Built an Android application using Flutter with integrated Machine Learning for predictive health risk analysis.
- Achieved 95%+ model accuracy by processing real-time analytics for health indicators.
- Optimized data fetching mechanisms, reducing application latency by 40%.

CERTIFICATIONS

- Oracle Certified Professional – OCI Data Science Professional (2025)
- Oracle Cloud Infrastructure AI Foundations Associate (2025)
- NPTEL: Human Computer Interaction – Score: 93%
- NPTEL: Introduction to Internet of Things – Score: 88%

ACHIEVEMENTS

- Winner – 6-Hour College Level Hackathon, M. Kumarasamy College of Engineering (2025).
- Participant – IEEE 24-Hour Global Hackathon; collaborated in a high-pressure environment to develop functional prototypes within 24 hours.
- Participant – Thooral Hackathon, Infinitum 2026 (National-Level Technical Symposium), PSG College of Technology (Feb 2026).
